60 responses

1 = "Not at all"

5 = "Absolutely"

How would you rate the course overall?

60 responses

1 = "Terrible"

5 = "Amazing"

What would you say about the course?

Excellent course, very engaging and helpful to reinforce learning.

Really insightful and very well structured. I just wish it would also be up in Scotland

It was so useful and I feel so much more prepared and have direction with my revision going forward

Great to highlight key conditions and the knowledge necessary for each one

Great course. I found the spaced repetition very useful

Really helpful. Enjoyed the spaced repetition and the random topics within each section so you weren't just pattern recognition and it kept it easier to focus all day

Really enjoyed the revision course! A great speed and covers so many topics. Really helpful for anyone in the run up to finals or even before. The format really worked for me and made me understand what I already know and what I need to focus on! Thank you for an amazing day!

This course has been a godsend in my MLA prep, thank you so much! Breaking the day down into topics and then going over key facts has been so helpful. I left feeling like I know where I need to revise, know my strong points and feel like it's much more manageable!!
THANK YOU!

Really great reset and comprehensive prep

I was concerned about being drained after six hours of revision and disengaged but found it was incredibly engaging and interactive. Loved the variety in specialties during question sessions rather than doing all in one chunk. Really great day and good breadth of knowledge. Would definitely recommend.

While the course can be quite challenging for Year 3 students, it provides valuable insight into my current knowledge gaps. This helps me identify areas where I need to focus my studies and develop a more targeted learning strategy

Great cases, very useful application of knowledge and good resources

Great, really fun

Thank you very much Tom! Really interactive, kept me engaged the entire day. I really liked the case based quiz and the spaced repetition questions dotted between cases. I've left with a clear rating table with my confidence in different areas, ready to target my revision before finals.

It was quite engaging and covered a a great range

So beneficial, the pace was great and the focus on high yield content and key information was brilliant.

Good revision course, all key topics covered

Very helpful and informative, great teaching would definitely recommend

Good pace and lovely explanations

Tom is an amazing lecturer - the course is delivered at the right level, with a good range of content. Definitely helped in my revision. Thank you so much!

Very helpful and comprehensive

Very good at covering a range of topics and hammering down the key facts!

The course was concise but also covered a good breadth of content. It was very well delivered and it tested existing knowledge as well as teaching the content as it went. The explanations meant the questions I got right and wrong were both an area of learning and improvement making it beneficial.

Really good overview helped me identify areas of weakness ready for finals

Really helpful - thank you so much! It got a bit tiring and hard to focus at times but it was hugely useful and allowed me to see what I know. Looking forward to using the guide and flashcards.

The zero to finals revision course is a fantastic summary of key finals information. I thought the day would be too information heavy, but it was a really enjoyable and accessible day.

Being broken down into easy sections and flipping between topics kept me engaged and focused. Thank you so much!

Very good

Excellent

Excellent course. Highly recommend

Good overall of the high yield content! Has given me a good idea of where to focus my revision - thank you!

Fantastic course structure with the integrated active recalls and spaced repetition. Felt the content was varied enough. Would like to have seen content on leukaemias in haem. Enjoyed all the med memes too!!

Very helpful overview of key facts and content in preparation for UKMLA - really enjoyed the course

very helpful

Loved mixing the specialties, allowed me to keep concentration for far longer than normal which i really struggle with normally. A great mix of easier/ more difficult qus. Absolutely love the recourses too - thank you so much :)

Despite being in the same lecture theatre all day you managed to keep us all engaged and learning which was amazing. Great coverage of key topics

Fantastic! Insightful and engaging af.

It was really helpful and helped me think about my revision plan

Amazing

Informative and fun!

Excellent teaching materials and methods, Tom is really easy to follow and understand

The course provided clear stepwise approaches to common presentations which helped cement knowledge already in place while also highlighting gaps in my knowledge. The added material provided will allow me to review these areas at home.

It was excellent.

Fantastic course covering a lot of core content

Great condensation of knowledge, highlighting key points that students ought to remember.

It's been extremely helpful to go over all the high yield information that is important to know for exams. Especially the explanations that you provided, were so useful in breaking down key concepts that were easily digestible. The active recall element made it great to assess my own knowledge. Thank you!

Goes over core material and incorporates special repetition very well

Concise

Great pace

Loved the diagrams and explanations

Zero book and flashcards were great too

Spaces repetition helped too

I could keep up with adhd

Management would be great and a to e for final year ukmla

Thank you for organising the course

The day was engaging throughout. A really great way to consolidate knowledge and identify areas for revision in a targeted way.

Good overview and starting point for each topic, something to focus around

Great pace and really engaging.

Really great day overall well paced and very enjoyable content

Very great interactive element to it, lots of writing so should've brought an electronic device rather than paper and pen but this was mentioned in the briefing email. Very grateful for the revision book and flashcards too

Very good overview of the things we need to know for finals.

Thank you

Amazing crash course covering all core contents

Very useful - would attend again for different topics as well

Efficient and concise, pitched nicely to dispel panic! Thank you so much

Absolutely amazing course, very engaging all throughout, unique concept of teaching via lots of questions and cases as most courses like this just talk through the conditions, everything was broken down into small, digestible chunks of information and the day as a whole was structured perfectly. Very much enjoyed and hope to come back next year!

A really well thought out and structured course. Engaging throughout. Thanks Tom!

A really well-structured and engaging day — Tom did an excellent job keeping us active and involved throughout. He covered all the key topics thoroughly, and I particularly appreciated the use of spaced repetition through the “key facts” segments. The Q&A format made the session highly interactive and effective for consolidating knowledge. The course book is an excellent resource for reinforcing learning, and the accompanying flashcards provide a fantastic tool for regular self-testing and strengthening knowledge.

Really good explanations to questions so we understand & also tips to remember
