166 responses

1 = “Not at all” **5 = “Absolutely”**

How would you rate the course overall?

166 responses

1 = “Terrible” **5 = “Amazing”**

What would you say about the course?

Really broad coverage of the MLA syllabus. The confidence rating tool was especially helpful so that I could identify areas where there are obviously knowledge gaps or where my knowledge is strong. The key facts and other aspects also helped to highlight some extra areas where I felt particularly weak. That weren't otherwise covered. The format was very helpful and the speaker is very clear and concise, delivering the most high yield content across each specialty without being overwhelming.

Super helpful

Amazing so so informative

Very useful

good coverage of lots of topics

So helpful thank you!

Amazing

informative

Really liked it

Very organised very informative

Brilliant. High yield.

Very helpful and great active recall

Really interactive

It was really informative - did not feel burnt out at all!

Excellent use of time (which during exam time says a lot)

Great teaching

Amazing course, very interactive throughout

Brilliant

I really enjoyed it very interactive session

It was amazing

Really useful

So helpful

Very thorough

Very good course and well organised

Thank you very much

Really wonderful course

Very helpful and good and having breaks.

Amazing !!! So good loved it !

Amazing questions and explanations

Great but a bit too easy/simplistic

Great day, interactive and excellent explanations.

It was incredible fun and interactive

Excellent

Very engaging and informative

Very interactive and engaging

Amazing - really the only opportunity you can get where you cover everything

Excellent

So so good, very useful high yield topics

Built confidence

High yield MLA topics

Very nice structured

super useful and engaging. really enjoyed it

Really engaging and helped remember the high yield content

Really useful and I love the interactivity

Really good! Very engaging and interesting! Would totally recommend

Great level and very interactive so didn't zone out

Enjoyed the question and answer

Good course
Covered a lot of material

Very helpful!!!!!!

Really useful and high yield

Brilliant high yield info, delivered very constructively, great engagement, great pace

Great, helpful

Very helpful and was useful for final year medical student who wants to revise before finals.

This was actually really good

Excellent revision of high yield topics

Engaging and informative. Would recommend

Good overview of the MLA content

Throughly enjoyed and was engaging throughout

Brilliant course! Great variety of content covered

Really helpful and concise

fantastic revision

Absolutely brilliant, thank you so much!

Very high yield content covered.

Excellent course thank you!! Great slides, excellent presenter, excellent resources

Great interactivity - really enjoyed the question style teaching

Really helpful and gives you a nice overall knowledge of where you are !

Really good pace and covered key facts, found it helpful to build awareness of my weak points

I really enjoyed this course it's helped me to gain better self awareness of my strengths and weaknesses and was very engaging throughout

It was so helpful, really great focused learning and exam tips, very interactive. Loved the addition of the standing up and raising hands.

It's given me motivation to pass

Amazing, clear and concise. Consolidated knowledge and learnt lots! Thankyou!!

This is a great session, even though it is a full day didn't feel that way.

Very helpful, Tom covers the high yield stuff really well, goes over the pathophys as well, and uses spaced repetition. Thank you!

it was a fun way to feel like you have covered all the areas at a decent level and identify gaps before deep studying begins.

Tom was a great teacher, covered all the content in such an engaging and fun way! Learnt so much more than I expected

Covered a variety of topics

Very useful revision in one day for MLA AKT

So so good, I wish you could teach everything at my uni, first time ever I've been able to stay engaged throughout a day!!

Very good course.

Very useful, interactive and fun !

It was a good fly by of all the topics/ specialties

Excellent

Amazing recap of material

Amazing course very engaging and interactive

Best Sunday so far

Really fun and interactive, gained lots of knowledge also

Loved the course, great explanations and memes, big fan of the videos!!

Simple to understand and Tom is a great presenter and v knowledgeable

Amazing! And so funny - learnt a lot and love the active recap and physiology explanations - like the slightly challenging questions on understanding

Really enjoyed layout of course and spot diagnosis

This was a really helpful course and well played out.

Really useful and well organised. Thank you!

I loved the format with the questions and answers

So well structured really engaging ! Thank you so much !

Lots of participation and engagement

The course was extremely helpful covering all of the highest yield content. I found the questions throughout a great way to test my knowledge.

Tom is amazing! Such a comprehensive summary of all the conditions. Thank you! I am so much more confident for my revision and UKMLA. Very interactive and I love the standing up breaks. The active recall is great.

Very useful, great high yield info, good humour and made very engaging.

Very engaging, informative and high yield

So useful! I loved the competition time, it helped keep it engaging

Very informative, great addition to my revision. Very encouraging environment to learn

Extremely useful and high yield

Fantastic course! Tom was so lovely. The session was fun, engaging and I learnt so much. Thank you!

Amazing - thank you!

Extremely helpful to revise high yield concepts. I was also able to identify areas where I needed to revise more.

Its a very well paced course

Very good chance to self assess your current understanding of the high yield topics

Good teaching, great examples! Great refresher before finals on key conditions with good knowledge bites.

Amazing! Super clear and great pace and amazing resources! Was not boring at all!

Incredibly helpful and engaging. The memes made me laugh a lot, and Tom is a cutie patootie.

Very engaging informative, pitched at the right level. Humour made it very engaging and memorable

High yield, very useful, good memes. Definitely recommend

This was a really informative session and Dr Watchman was really engaging!! Kept us on track and covered the most salient points in a easy to understand manner.

Very clear explanations, great pace and humour too!

Very well run, good pace, fun and interactive. First class all round

extremely helpful in highlighting key information and areas to work on before the exam

Very engaging and interactive course covering the high yield topics

Amazing thorough content, very very helpful

Really good and interactive

Very well put together good breadth of knowledge. Highlights key areas to focus on and any weaknesses. Interactive and fun

Amazing!! Such a good overview of the high yield conditions and has given me the motivation I need to prep for finals

So good, low pressure which really helps, made me realise I actually know some stuff! Tom is so friendly and engaging, the day just flew by and we were sad it was over! So much fun :)

It was so helpful, and so engaging. I feel much better going into finals now.

Really engaging throughout and made the day fun with plenty of humour and stories. Excellent resources to take away which will be a huge help for these last few months before exams and beyond. Thank you so much!

It was really helpful and gave a good overview of the content we need to cover for finals. The pace was really good and didn't feel boring despite being such a long day.

Good

Excellent whistle stop tour of all the key areas for AKT. Great audience participation element

Very engaging as someone who struggles to concentrate and very clear factual concise information to yield high MLA AKT topics

Fantastic 100/10
Will come again but then I'm final year so I guess
Love how all the questions are randomised and it shocked me I managed to concentrate throughout the whole day

Really great format. Food consolidation, learnt some new bits and also learned my weaknesses. Generally a great day.

Really engaging! The information was presented in a way I found really accessible. The pace of the teaching was spot on and I enjoyed how interactive it was

Extremely well organised and helpful quick revision covering all key concepts. Did not realise how 8 hours went by without being tired at all. You are an amazing teacher! Waiting for another session

Very helpful so engaged the entire time

Fantastic. Questions were brilliant. Mixing up the content on each session between topics was really useful and felt more like exams. Pace of the day was perfect. Will be telling the Queens Students in the years below that the course is well worth the flight over!! Couldn't recommend enough!!

Excellent high yield information and very engaging teaching - thank you!

Very well-expalined, engaging and amazing selection of high yield content relevant for exams.

Really useful and a good recap on all the common conditions

I enjoyed the spaced repetition, appreciated the additional materials (book and flashcards).

Very useful and covers a broad range of specialties. I enjoyed the addition of segments where we had to stand up to answer. I think it helped with engagement on what is quite a long day.

It was really helpful for all the high tells information.

Great course to recap core knowledge. Dr Watchman is incredibly entertaining and brilliant at teaching. I love that spaced repetition was involved in the course.

Brilliant

I really enjoyed the course! It was engaging, and I liked getting to practise recognising clinical signs. The real-life examples and memory tips made the key points easier to remember.

Felt is was the best course on finals so far due to the memes making it stick and real jokes etc and the way spit diagnosis was thrown in to mix it up. Would love more in the year where like we can learn say general med one day and speciality one day so maybe a two or three day course. Felt the main reason I absorb is the pace and tone of Toms voice as very soothing and so makes even a stressful topic better to take in. Loved how Tom let us ask questions at end and breaks and just knows how to make visual resources and make more fun.

The course was too easy. The questions were not MLA focused or representative of what could come up in the final exam. Passmed/quesmed is a lot harder and more representative. Questions need to be harder

Very informative, amazing presentation and clear explanations- and absolutely loved the memes!

It was very clearly delivered and the coure had so much helpful information. I cant thank you enough Tom! Many thanks for such great support for my revision.

Informative and engaging. Very useful.

It was very well-detailed which highlighted the high-yield content and was delivered at a good pace.

Excellent, worth every penny to the point I attended twice!

It was really useful to go through the high yield content. and the repetition of the key facts was really useful. The memes really helped remember the content so that was helpful. Thank you so much for this course

Honestly, 10/10! Absolutely brilliant! I’m so glad I attended this, it was excellent revision before my upcoming AMK exams. The pace was just right and I thought it was super interactive by asking us Qs and getting us to write down the answers before teaching us. I will be attending next year too before my final medical school exams. Thank you Dr Tom, I

really enjoyed myself and learned so much from you! (Ps, I also really liked the “stand up” games that came with a winners sticker - these were so good and at just the right time to keep everyone’s attention and make the course even more interactive!)

Really informative. It was concise and very helpful! I’m glad I attended the course. The questions were slightly easy. If there were some challenging questions it would have helped strengthen knowledge.

Great overview of high yield MLA topics

It was very fun, interactive and inclusive! Included all the high yield facts and it was great to finally see the man behind Zero To Finals in person and give a live lecture! The materials given are also very to the point and I’m sure I will find them very beneficial for my revision!

Really good concise revision day. Loved the way you covered so much in so little time and amazing use of cases for each topic. [HOWEVER: feedback as a PA student, there was stuff that I never covered and went way over my head, lol. Plus, I am also very use to/ trained up for MCQs that I struggle to answer short answer questions now 😭. Maybe do a session specifically for PAs (if we still exist)]

It was a good course helped me gain confidence for UkMLA prep. Would highly recommend

The course was amazing- facing revision over Christmas it’s quite overwhelming with the amount of topics and not knowing what to focus on. Tom kept us engaged all day and the active recall really helped me learn key facts

WWW: I really enjoyed the technique very comprehensive.
liked the memes- good structure broken up into small bits-
Really enjoyed it- really insightful- showed me what i need to learn and gaps
EBI:
Suggestion for what to bring with us: coloured pen- can help with marking and distinguishing what we got right and wrong- I realise it may be personal preference, but suggestion may be helpful
Maybe we could use menti meter for MCQs- find that to be easier to ensure isolated answers
maybe more explanation on 'confidence' score- sometimes it can help to quantify it.
rate confidence sheet - nice that it was in sessions but maybe a bit more randomised so we know which topic ISN'T coming up- e.g predict diagnosis from the rate your confidence section
maybe a bit of guidance to set up our written answers. e.g have your answers on one side and right answer/learning point on another- (again personal prefence, but I think i would have liked guidance)
(I loved the course and the vibes and learnt so much (please don't take it as negative!)- it was such a lovely experience- i just thought to say in these^ in case you wanted some EBI points)

Good course highly recommended

The topics were comprehensive and I genuinely took so much from it. One thing that really stood out to me and I'll never forget is the diagram for the risks for cystic fibrosis. I hope there could be more days, maybe a weekend event. I'm heading into revision for finals more confident.

The questions were high yield and the explanation was very clear and easy to grasp. The personal stories and memes helped retain facts and break the monotony. Really enjoyed the course and was able to engage throughout the day without feeling burnt out. This was very helpful as I now understand the topics I need to focus on what my strengths are.

amazing! i travelled all the way to london from lancashire to attend the course today and im really glad i did, it was really helpful. Tom's anecdotes and explanations are a great way to remember small details:)

Very enjoyable. I wasn't able to stay for the last session so don't know what I missed, but I'd really appreciate a breakdown of how the high yield topics covered relate to the full exam content. On the course information it says "The course focuses on the 20% of information across the curriculum that accounts for 80% of what comes up in the exams." So what I'd like to have please is a breakdown of what the 100% content is and what the 20% accounting for 80% of exam questions is. That would really help me focus my revision in follow up to the course.

It was a very quick great run thru of all the high yield knowledge. I really enjoyed the random key facts, super high yield.

Absolutely Loved it

***each new paragraph is a separate review submitted by someone who attended the course**
