

ZERO FINALS

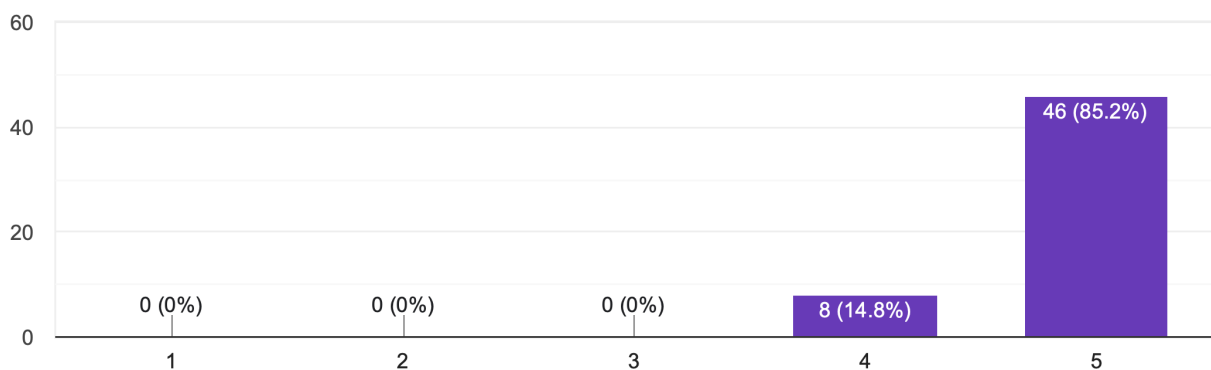

Medical School Finals Course

Manchester

12th October 2025

How helpful did you find the course?

54 responses

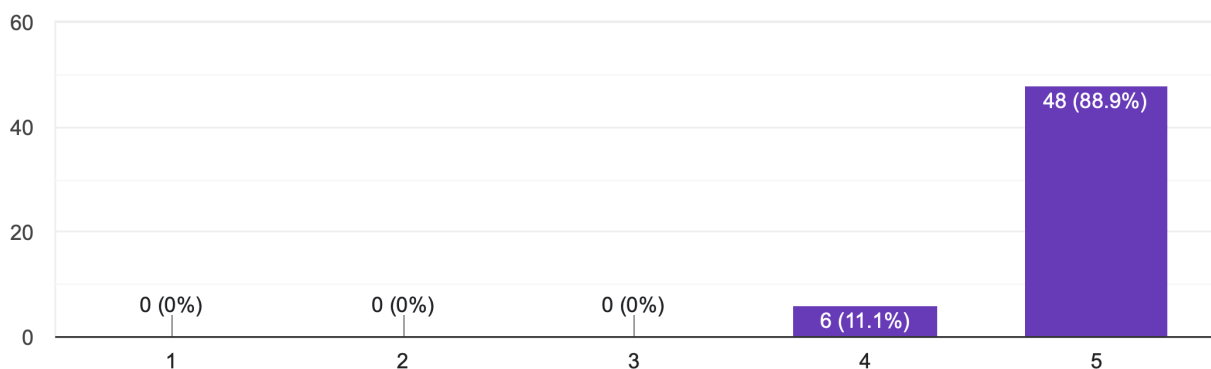

1 = "Not helpful at all"

5 = "Extremely helpful"

Would you recommend the course to others?

54 responses

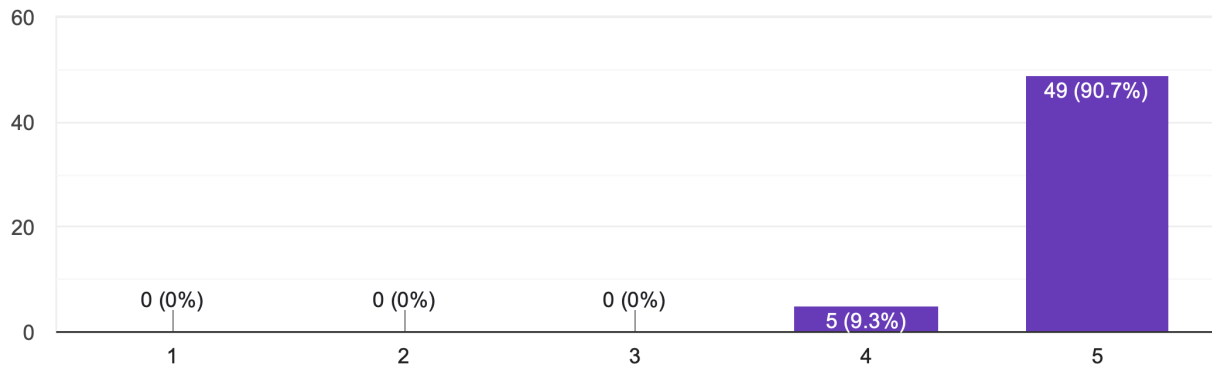

1 = "Not at all"

5 = "Absolutely"

How would you rate the course overall?

54 responses

1 = "Terrible"

5 = "Amazing"

What would you say about the course?

Very interactive. You will 100% learn and retain the information by the end of the session.

Amazing

Really engaging, really helpful teaching method asking questions to make you think and learn! thank you :)

Fantastic revision session across different specialties, really helpful even as a 4th year to help guide my revision going forward. Tom is a great teacher and this lecture which uses free recall to support learning in a very useful way.

The course really went through all the most important topics in the best way and the spaced repetition helped a lot.

The format is very good- I much prefer the write down method versus the someone shouting out all the time - aids with memory. Cases were well chosen. Well presented (obvs). Spaced repetition also v good tool.

Absolutely flawless, taking care about the finest of details and going at a pace that suits everyone and of course using spaced repetition! Tom & Harry are the best!

Very informative

Excellent pace of high yield topics. Kept me engaged from start to finish. With great humour throughout.

Very helpful with active recall and covered high yield content!

Good course, could make topics discussed a bit more difficult but it was a very well made course which covered all topics.

Comprehensive, engaging, covers all specialties

It was an extremely helpful course. Thank you very much!!

Looked it i wish to attend more of it

Great starting point to test knowledge prior to starting to study for exams

Very engaging

- high yield
- interactive
- fun
- educational

Such a well thought out and well prepared course. Such a useful and enjoyable day of study

The Zero to Finals course was an excellent learning experience that helped me both consolidate and expand my knowledge. The course was well structured, highly interactive, and covered a great mix of specialties. I particularly liked how key facts were repeated and re-tested throughout the day; it really helped them stick better. The pace and delivery were very inclusive and easy to follow, which made the sessions engaging from start to finish.

Tom is an outstanding teacher — clear, supportive, and genuinely passionate about medical education. The additional materials (book and flashcards) were also fantastic and practical additions, allowing us to easily review everything covered during the course. Overall, this was a very well-designed and impactful course that I would highly recommend to anyone preparing for their finals!

Very well organised, thorough content, good engagement. It was helpful that we answered the questions individually by writing. Allowed to keep engaged and accountable for own learning instead of zoning out if someone else answers the question.

Very useful and high yield

Very well organised and a great pace. Covered very high yield topics and the spaced repetition was really good.

Very helpful for identifying weaknesses

I love it! My second time

Really well put together thank you

Really easy to follow, good summary of key facts

Excellent

INCREDIBLE! So so informative

So useful with all the high yield topics. Clinical based learning is what we need! In future hope there will be longer crash courses

I would like to say a massive thank you for organising and running this course. It was great to see a lot of the topics being covered and to give an overview for our revision, whilst highlighting the areas where we can further focus our revision in preparation for the final exam. The fact that this was in question format and being able to practice active recall and spaced repetition was extremely useful and would like to thank you for your time in constructing n this course! Thank you so much and looking forward to using the revision resources.

The course was so helpful and I really liked the style of it and the spaced repetition and cases. This was my second time doing the course as I am not in final year yet but really enjoy it and learnt so much last time that I came back again! Thanks so much!

I liked the pace, the interactive questions, the confidence rater, the booklet

Quite helpful, at the appropriate level. Good structure, keeps you engaged. The self scoring system was helpful and enlightening. Discussion in the form of cases makes it easy to remember. Repeating of important facts helped. Loved the memes!

A good overview of high yield content.

I think it was a very very good revision of the basic knowledge needed to understand clinical cases. The structure of the course was very well organized and it did not feel heavy at all. It might be helpful to use tools similar to menti or kahoot anonymously just to get an idea of the level of knowledge of the group. This could help tailor the session to the appropriate level. I found that most concepts were good revision of content expected in my third year, so I personally would have loved a little more clinical challenge for fifth year finals with more UKMLA style questioning.

Extremely helpful! Went over high yield MLA topics and the repetitive questions were so useful to recall important answers.

Great course lots of information presented in a way it was easy to remember

It was amazing, interactive and included high yield content

Great practice questions and high yield contents

Loved the case based learning! Was very helpful. Would recommend to friends

It was great!

It's a great rundown and revision session that showed me where I have gaps. Thank you!

So helpful cutting through the noise and focusing on what's important

A starting point for revising, clearly highlighting areas of strength and weakness

High yield. Things that come up regularly so great refresher. Liked the different techniques e.g spaced repetition to help with memory. Thanks so much!

Absolutely fantastic! Great use of spaced repetition and really building up your knowledge from the get go. Key facts presented in a clear, concise way and the resources you get are so worth it as well! Very handy revision tools overall and an amazing way to really consolidate and prep you for finals! Tom was also wonderful and checked in with us and was very receptive to questions and it was surreal hearing his "Tom Tips" in real life (plus the memes were a funny and welcome addition!). Would 100% recommend the course!!

very good summary of most of the important topics!! hopefully can make it a longer intensive session to cover more things, but otherwise, it felt like a good 6 hrs of fun!!

I found the course very helpful. Format was great! I liked the use of the key facts throughout and how spaced repetition was used to solidify knowledge. Toms a natural teacher and very engaging. I genuinely enjoyed the day and definitely came away feeling more confident heading into finals. Highly recommend.

Only small improvement (feel free not to include this part if you are posting reviews) would be if afterwards we received a list of the questions we answered in order. Would be really helpful so I could go back through my notes and confirm which questions I got wrong for revision, as I didn't always have time to note the question down. I'd also be interested to answer the same questions again at home to see if I improved after the course. Overall really good day, found it very helpful.

Excellent. Great day. Gives you an idea on where to start and what you really need to know

Really informative, great way to remember high yield content. Enjoyed the questioning aspect of it.

I was impressed by how engaging the course was—I remained attentive throughout the long day and was able to absorb most of the material effectively

Awesome, thank you!
